Leveraging ABIM Data to Create Individualized Learning Plans

*Friday, September 18, 2026
9:45–10:45 AM CST*

Disclosure

- *Nothing to disclose*

Overview

- *Highlight how ABIM collaborates with professional societies to use assessment data to support individualized learning plans built on society educational resources.*
- *Highlight key considerations related to data sharing, governance, and collaboration.*
- *An example will illustrate how a society has integrated assessment data into educational offerings to support customized learning plans for members.*

What is an Individualized Learning Plan (ILP)?

- An opportunity for ABIM diplomates to close knowledge gaps using their latest assessment results and specialty society activities.
 - Specialty societies map their product to ABIM's blueprints
 - Diplomates then give permission to ABIM to share their latest assessment result (certification or MOC) with their specialty societies.
 - Societies use imported data to create individualized learning plans
- Physicians can use the individualized learning plans to target missed questions and knowledge gap areas.
- The GOAL is improved learning that leads to Improved Patient Outcomes!

Process Overview

Considerations

- **Mapping of educational resources** to assessment **blueprint(s)**
- **Physicians** can grant digital **permission** through our HTTP standards-based process to share their most recent assessment results
 - Once consent is granted, ABIM automatically transmits the most recently verified assessment results
- The **ABIM-Society Consent Platform** acts as a secure bridge for physicians to authorize the sharing of their official assessment results with external organizations

IT Considerations

- **Publicly Accessible Server:** A secure hosting environment where your system can receive automated web hook messages from ABIM.
- **Static IP Addresses:** Permanent digital "home addresses" for your servers
 - Required for ABIM's security whitelisting process.
- **HTTPS & Security Certificates:** A valid SSL/TLS certificate to ensure all data is encrypted during transit.
- **Data Storage:** An internal database or persistence mechanism ready to house and organize the incoming exam results.

ACP MKSAP's ABIM Data Download Feature

ACP MKSAP's ABIM Data Download Feature

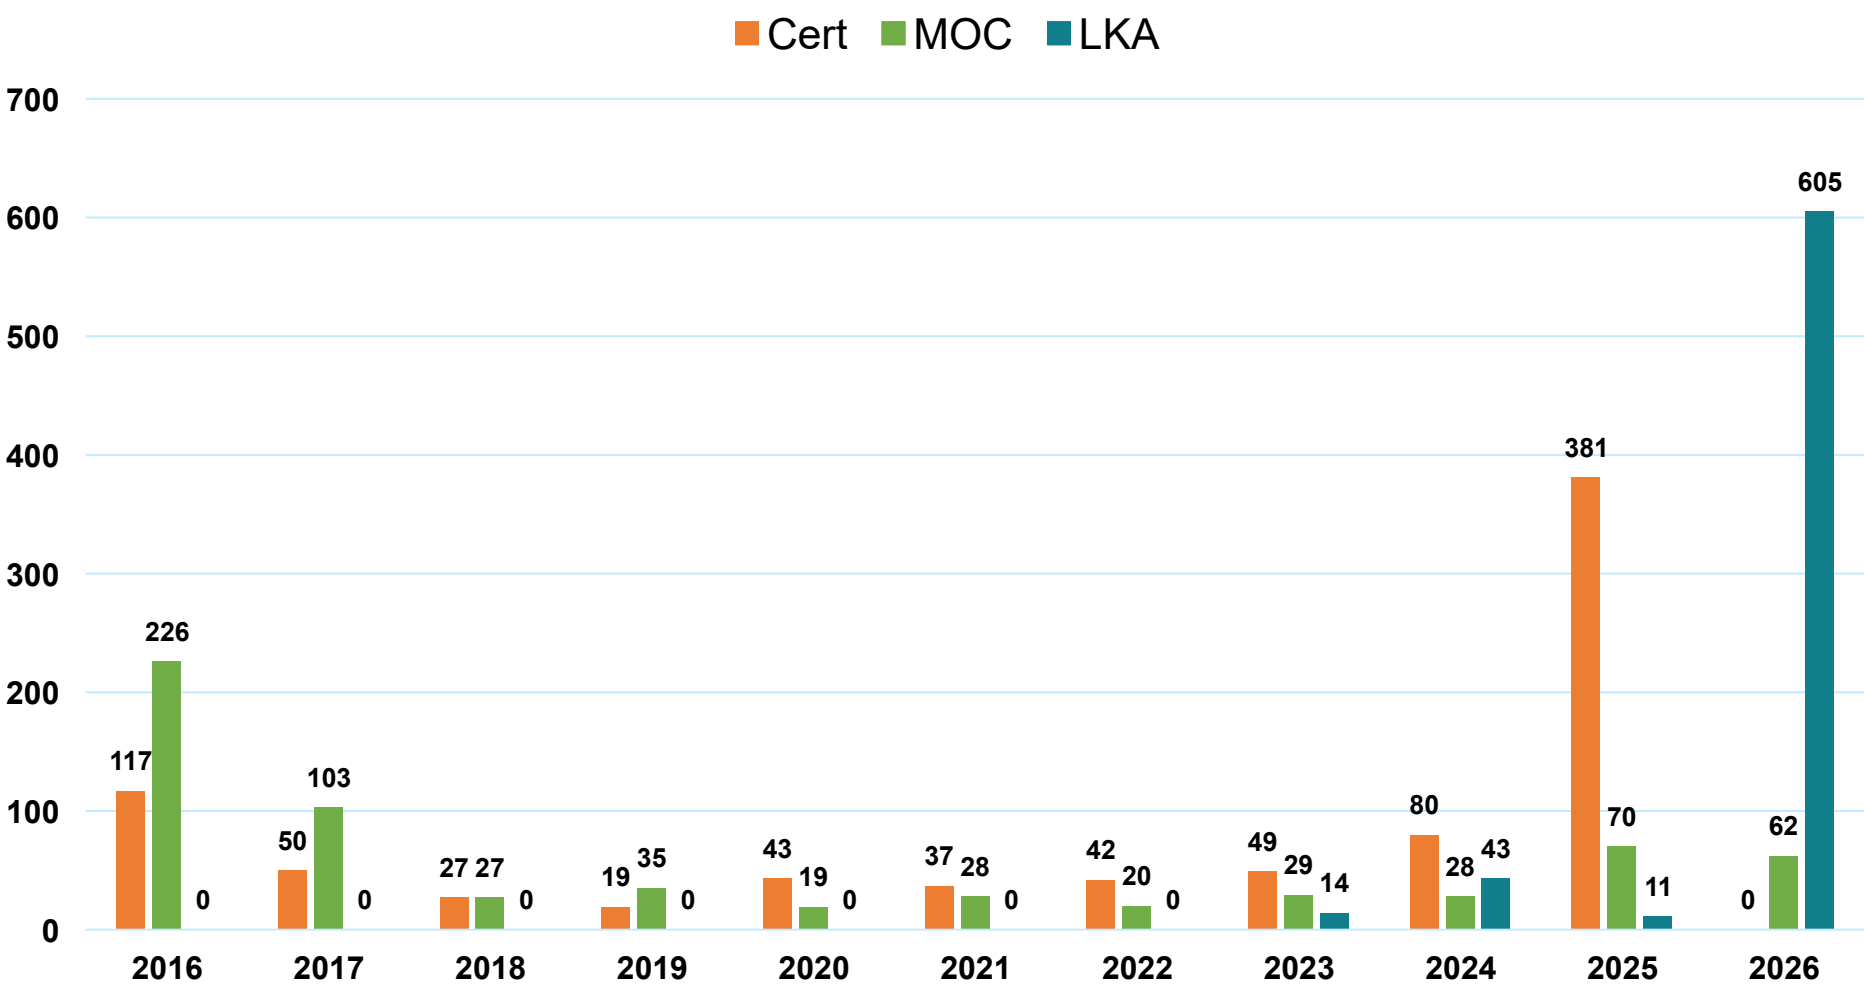

- Launched in February 2026, ACP MKSAP's "Data Download" feature allows ACP MKSAP® subscribers to build a personalized ACP MKSAP Learning Plan based on topics relating to their most recent ABIM assessment results.
- The ABIM Data Download feature within ACP MKSAP is ***the first national Precision Education program for practicing internal medicine physicians.***

The logo features the text "ACP | MKSAP" in a bold, white, sans-serif font. A vertical bar separates "ACP" and "MKSAP". A registered trademark symbol (®) is located at the top right of the "P" in "MKSAP". The text is centered on a blue background with abstract, rounded geometric shapes in various shades of blue and purple.

ACP and ABIM Announce Collaboration to Help Physicians Customize Learning Plans in ACP MKSAP®

PHILADELPHIA, January 20, 2026 – The American College of Physicians (ACP) and the American Board of Internal Medicine (ABIM) today announced a new collaboration that will allow ACP MKSAP® (Medical Knowledge Self-Assessment Program™) subscribers the option of importing their most recent ABIM assessment results directly into their ACP MKSAP account to inform a customized learning plan.

This feature will launch on February 25, 2026, and will be included at no additional cost for ACP MKSAP subscribers.

With the addition of this new feature, ACP MKSAP represents the first national Precision Education System for practicing internal medicine physicians. It complements ACP MKSAP's Internal Medicine In-Training Examination® (IM-ITE®) Feedback feature, which enables physicians-in-training to import educational objectives from incorrectly answered IM-ITE questions into their ACP MKSAP program. Together, these tools assist physicians as they efficiently identify and attempt to close knowledge gaps.

Results from the following ABIM assessments may be imported:

- Internal Medicine Certification Examination;
- Internal Medicine Longitudinal Knowledge Assessment (LKA®).

Research Opportunities

Research Prospects

- What is the initial uptake and reception among diplomates, and how does usage evolve over time?
- How are diplomates using individualized learning plans (ILPs)?
- Do personalized, feedback-driven learning plans correlate with assessment outcomes?
- Do personalized, feedback-driven learning plans correlate with patient outcomes?

Thank You
