Nothing presented today will appear on any exam from ABIM.

Overview

01

THE PROBLEM

What's holding diplomats back from finding the right activities?

02

THE TWO SIDES

Let's explore the data two very different sources.

03

THE METHOD

How do we turn plain text into meaningful matches?

04

THE OUTPUT

See the full picture, mapped in one place.

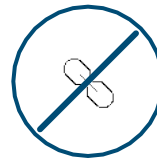

The Problem

How does a diplomate find what learning activities to pursue when they're struggling with a portion of our exam?

ABIM Score Report

Contains: Item-level results per diplomate

CME Content Library

Contains: Lectures, journals, courses

Two Vocabularies

Two distinct datasets, one provided by ABIM the other by ACCME

A CODE

2 . 3 . 2 . 2

2 Cardiovascular Disease

2.3 Ischemic heart disease

2.3.2 Acute coronary syndrome (ACS)

2.3.2.2 NSTEMI

AN ACTIVITY

DOACs and Patients with Malignancies

Type Enduring Material

Specialties Interventional Cardiology | Cardiovascular Disease | ...

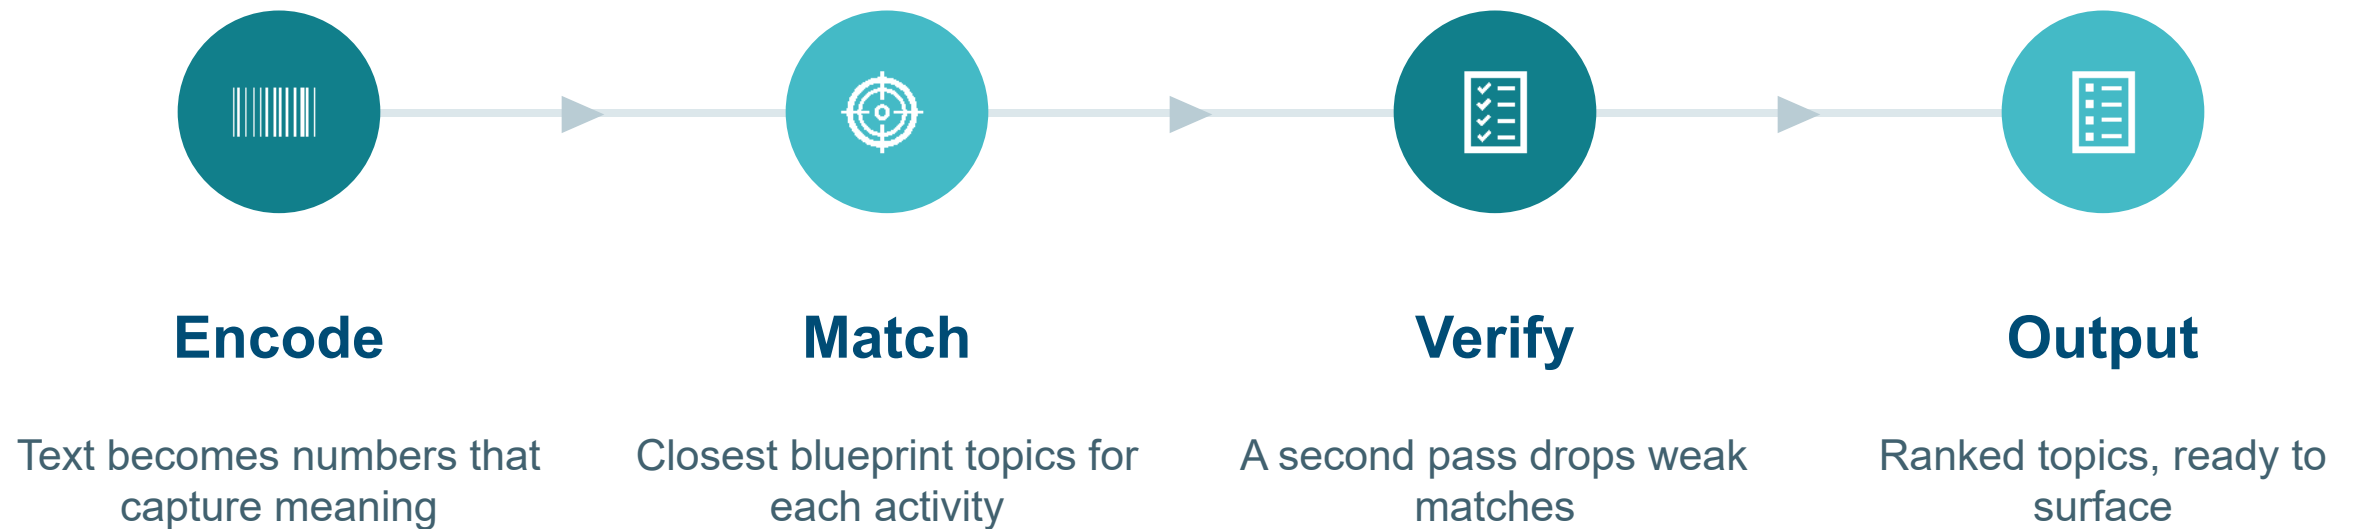

Description Direct acting oral anticoagulants (DOACs) are a newer class of medications ...

Building a Shared Language

The end goal is a map from all five blueprint levels to a provider's full learning catalog

Matching Blueprints to Activities

ENCODE

Convert every CME activity and blueprint topic into a numerical representation of its meaning.

CLINICAL LANGUAGE

**Ischemic Heart Disease
Lunch & Learn**

Activity Type:

Enduring Material

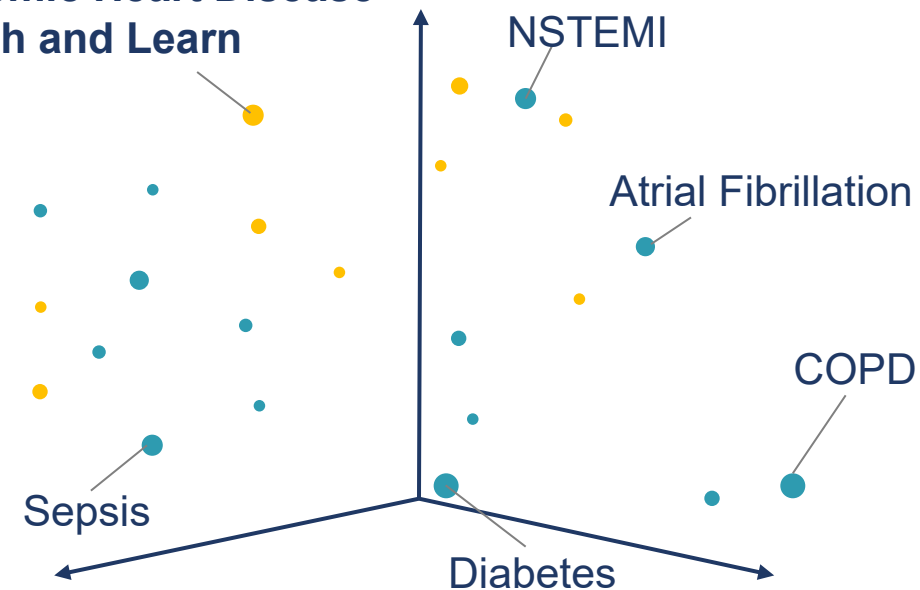

Specialty:

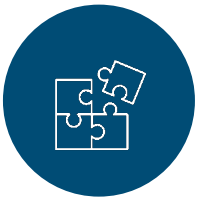

Cardiovascular Disease,
Internal Medicine

EMBEDDING SPACE

Ischemic Heart Disease
Lunch and Learn

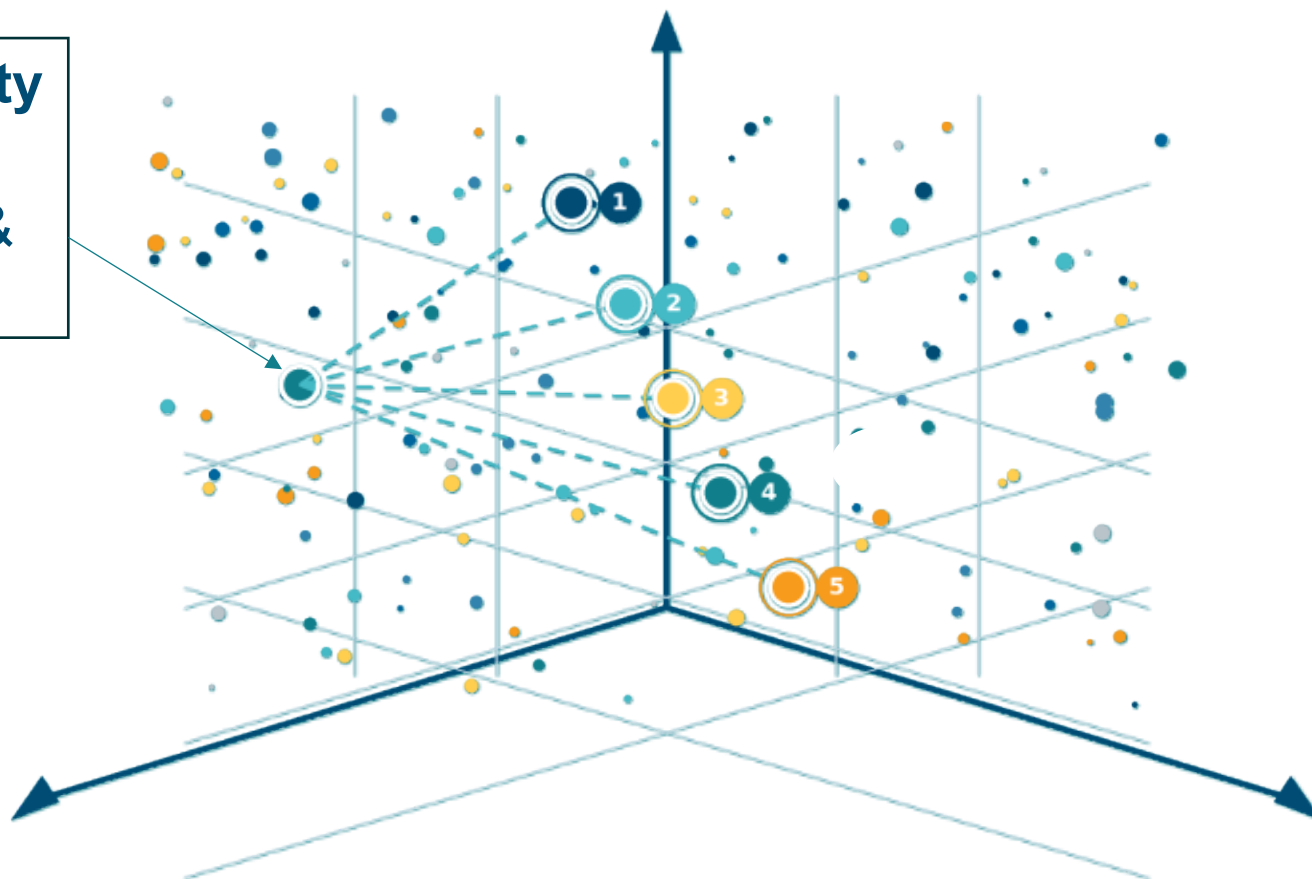

MATCH

Find the blueprint topics which are semantically the closest to these embedded activities

Learning Activity

Ischemic Heart
Disease Lunch &
Learn

Top Matches

*Closest items within
embedding space*

- 2.3 Ischemic heart disease
- 2 Cardiovascular Disease
- 2.5 Congenital heart disease in adults
- 2.3.3 ACS complications

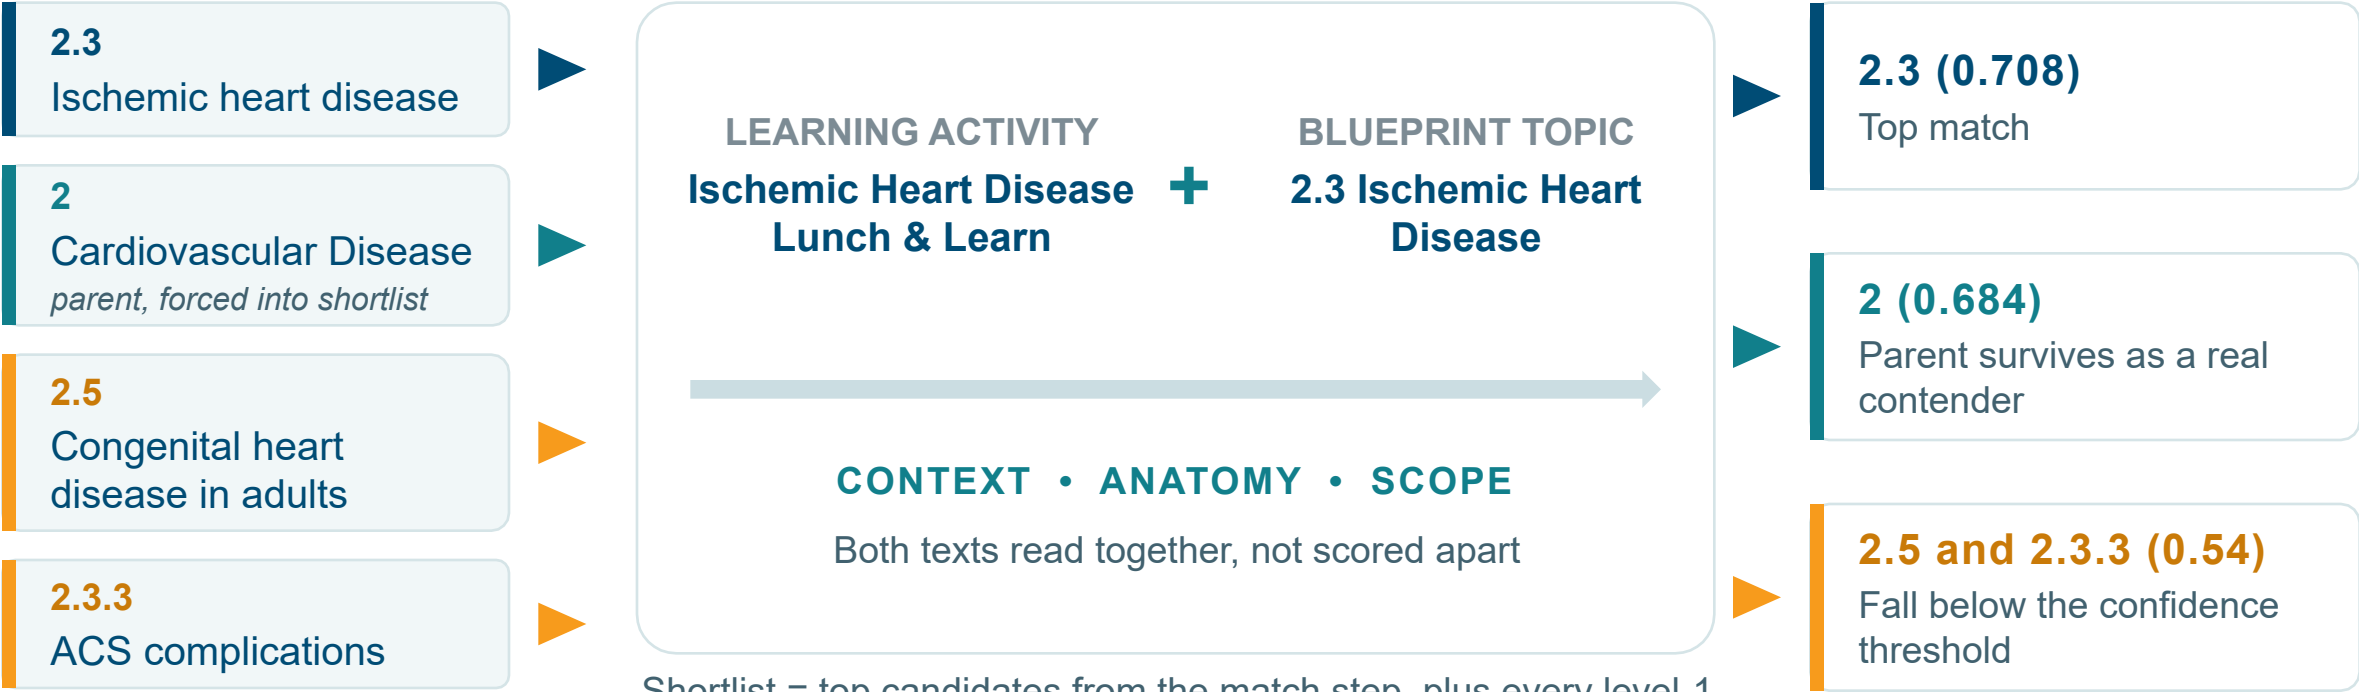

Read each activity and candidate topic together before the match is accepted

SHORTLIST

READ TOGETHER

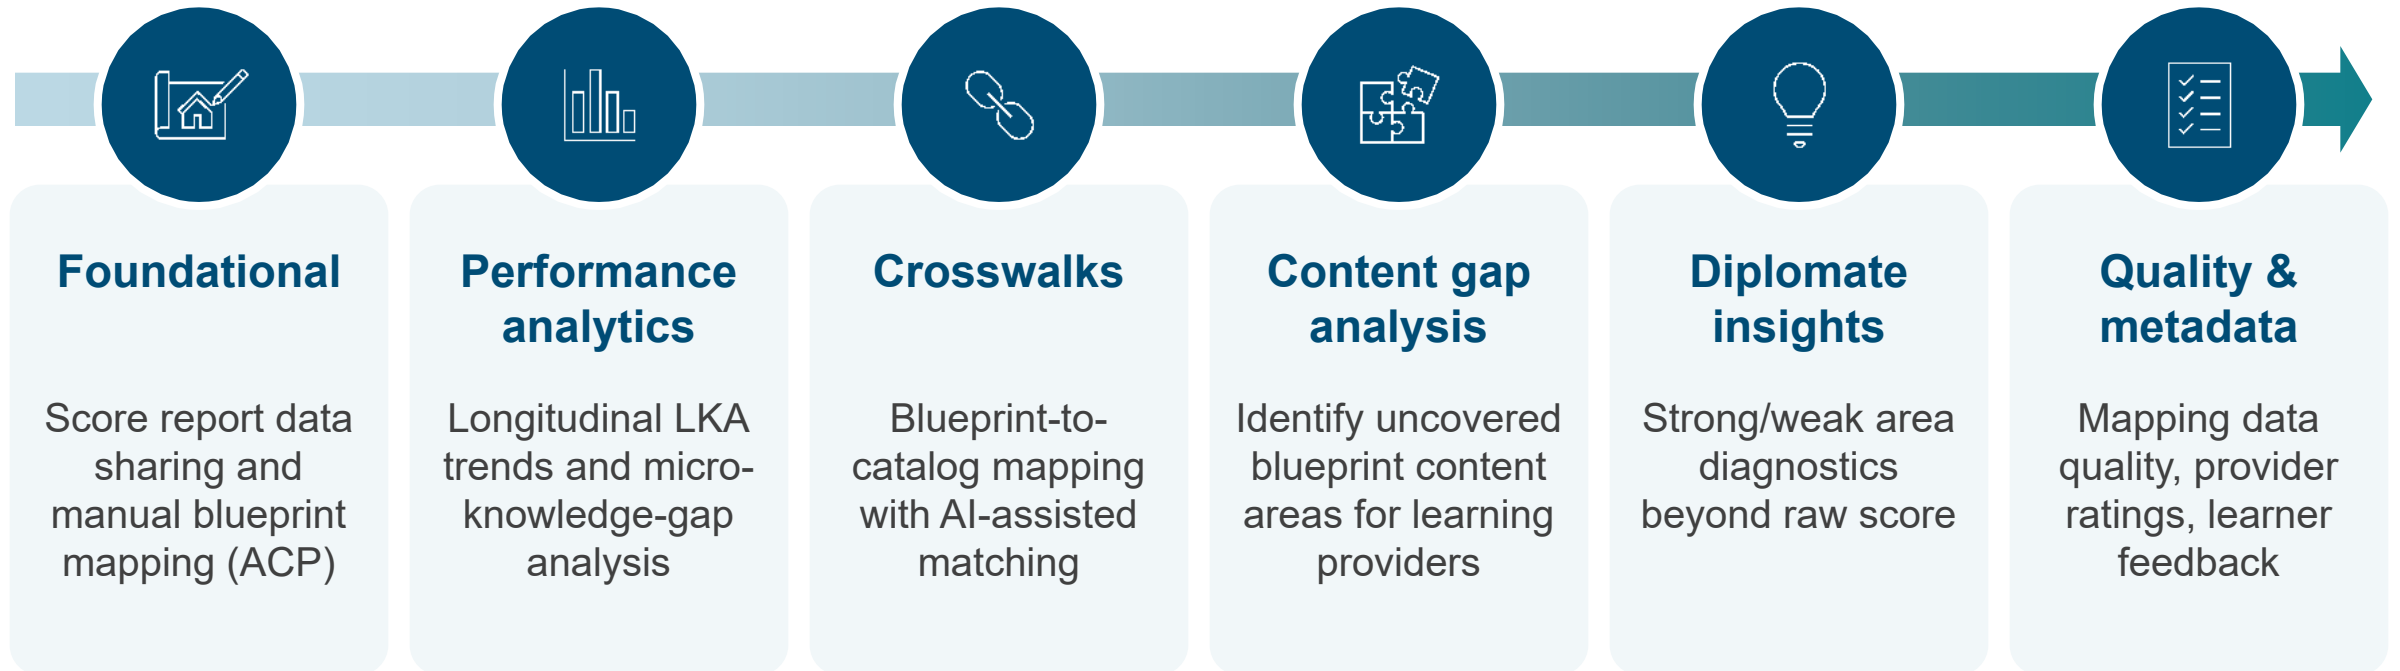

SCORE

Shortlist = top candidates from the match step, plus every level-1 and level-2 parent

How Can We Leverage This?

A Spectrum of Offerings

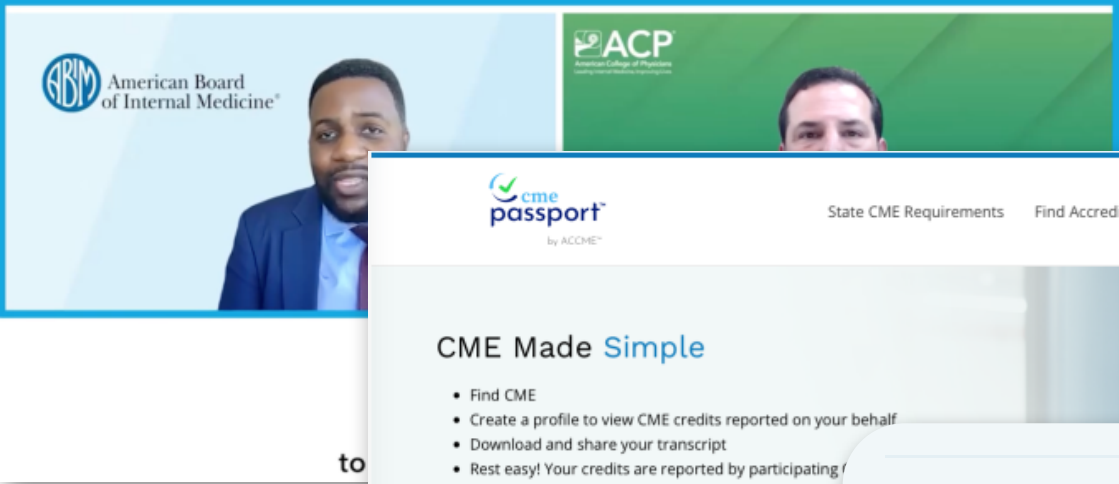

Where are we now?

Toward individualized learning
