Nothing presented today will appear on any exam question you take from ABIM.

Agenda

- Measuring the ABMS Competencies
- Building Competency Models
- Leveraging the Milestones
- Challenge of Innovating across 20 Models
- Creation of Compass
- Compass Demo
- Future Directions

Measuring Complex Competencies

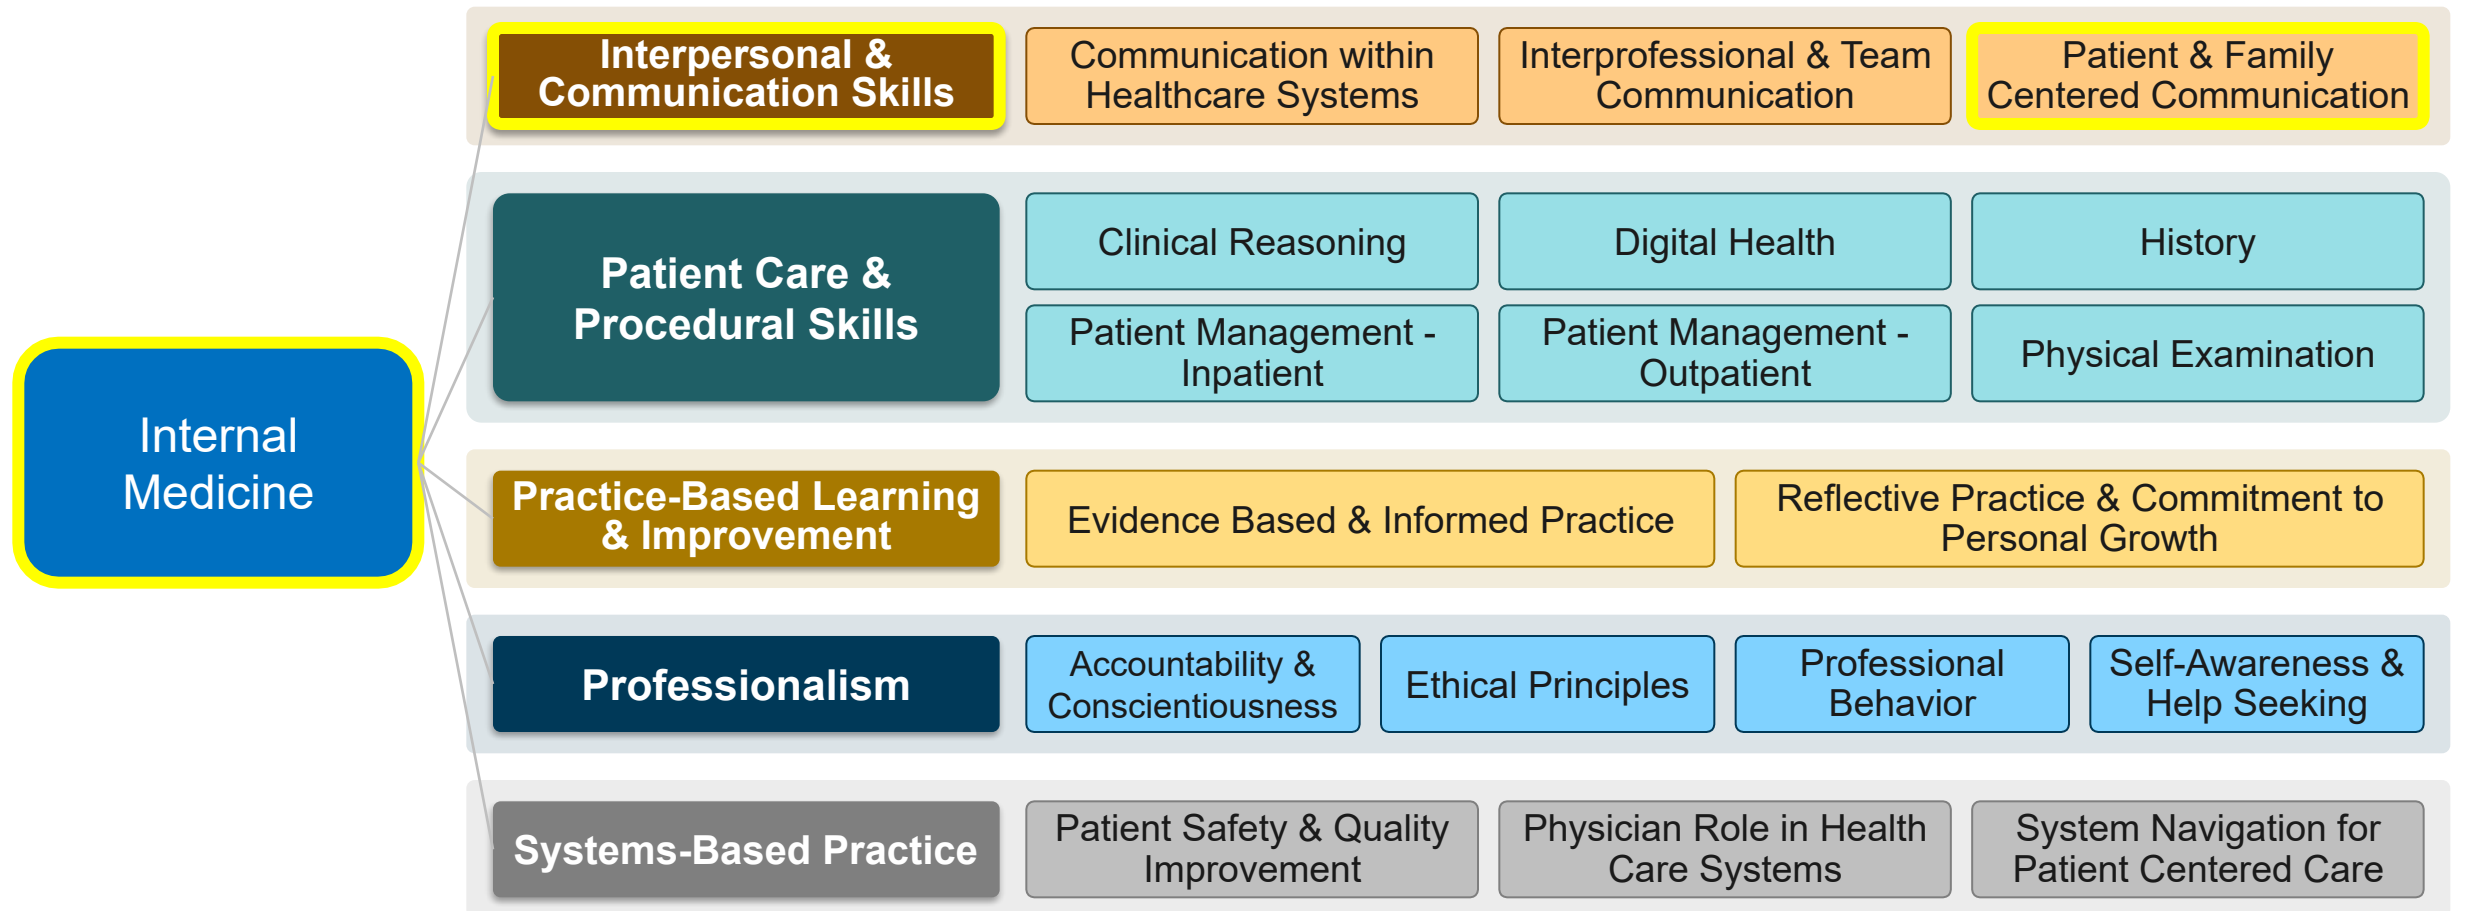

Measuring Complex Competencies

From Competencies to Milestones

From Competencies to Milestones

From Milestones to Behaviors

Internal
Medicine

Patient & Family Centered
Communication

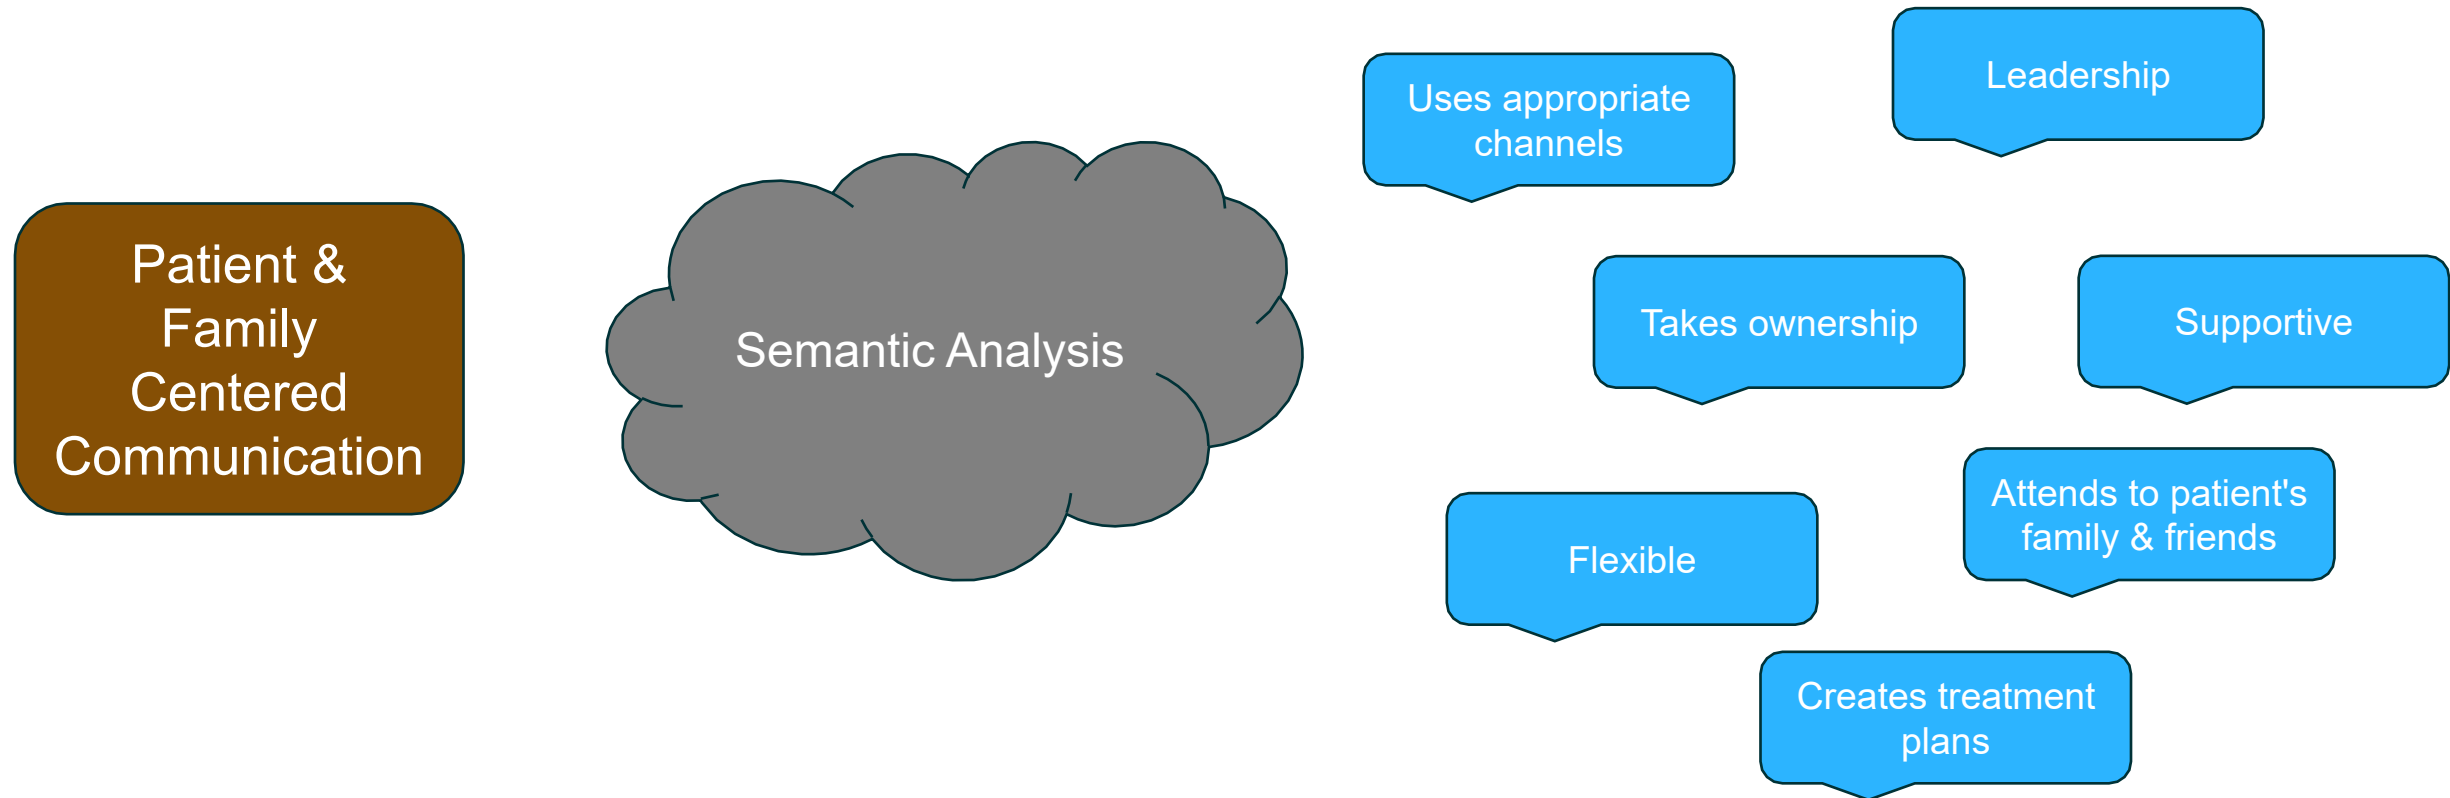

Level	Landmark
1	Uses language & non-verbal behavior that shows respect & builds rapport
2	Therapeutic relationship in straightforward encounters; identifies common barriers
3	Therapeutic relationship in challenging encounters; identifies complex barriers (incl. bias)
4	Uses shared decision-making in all encounters; mitigates communication barriers
5	Coaches others in relationship-building & barrier mitigation; models mitigation skills

From Milestones to Behaviors

Specialty	Landmark
IM	Uses shared decision-making in all encounters; mitigates communication barriers
Geriatric	Supports family/caregivers through team collaboration
Nephrology	Easily builds relationships regardless of complexity; proactively minimizes barriers; independently uses shared decision making
Adv. Heart Failure & Transplant Cardiology	With guidance, establishes a therapeutic relationship in challenging patient encounters Attempts to minimize communication barriers, including reflection on any personal biases With guidance, uses shared decision making to implement a personalized care plan

Leadership

The Challenge of Working with the Data

Creating a new Competency Model

What the model needed to do

Identify item types at a glance

Search across the full library

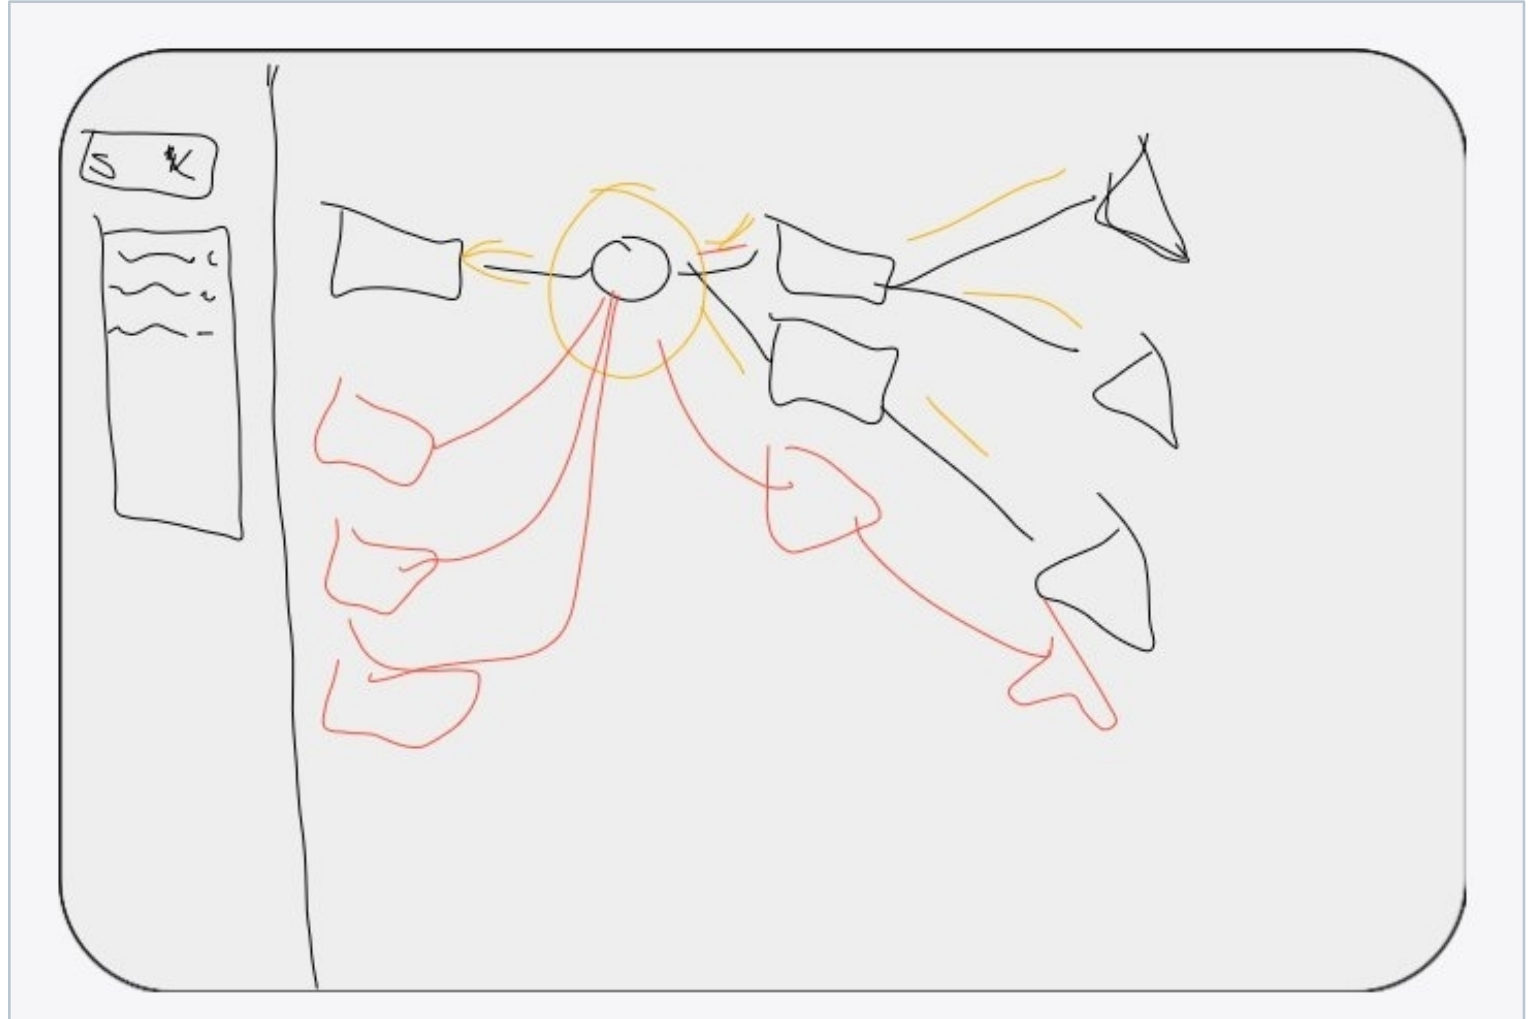

Filter items by their relationships

See every relationship in one view

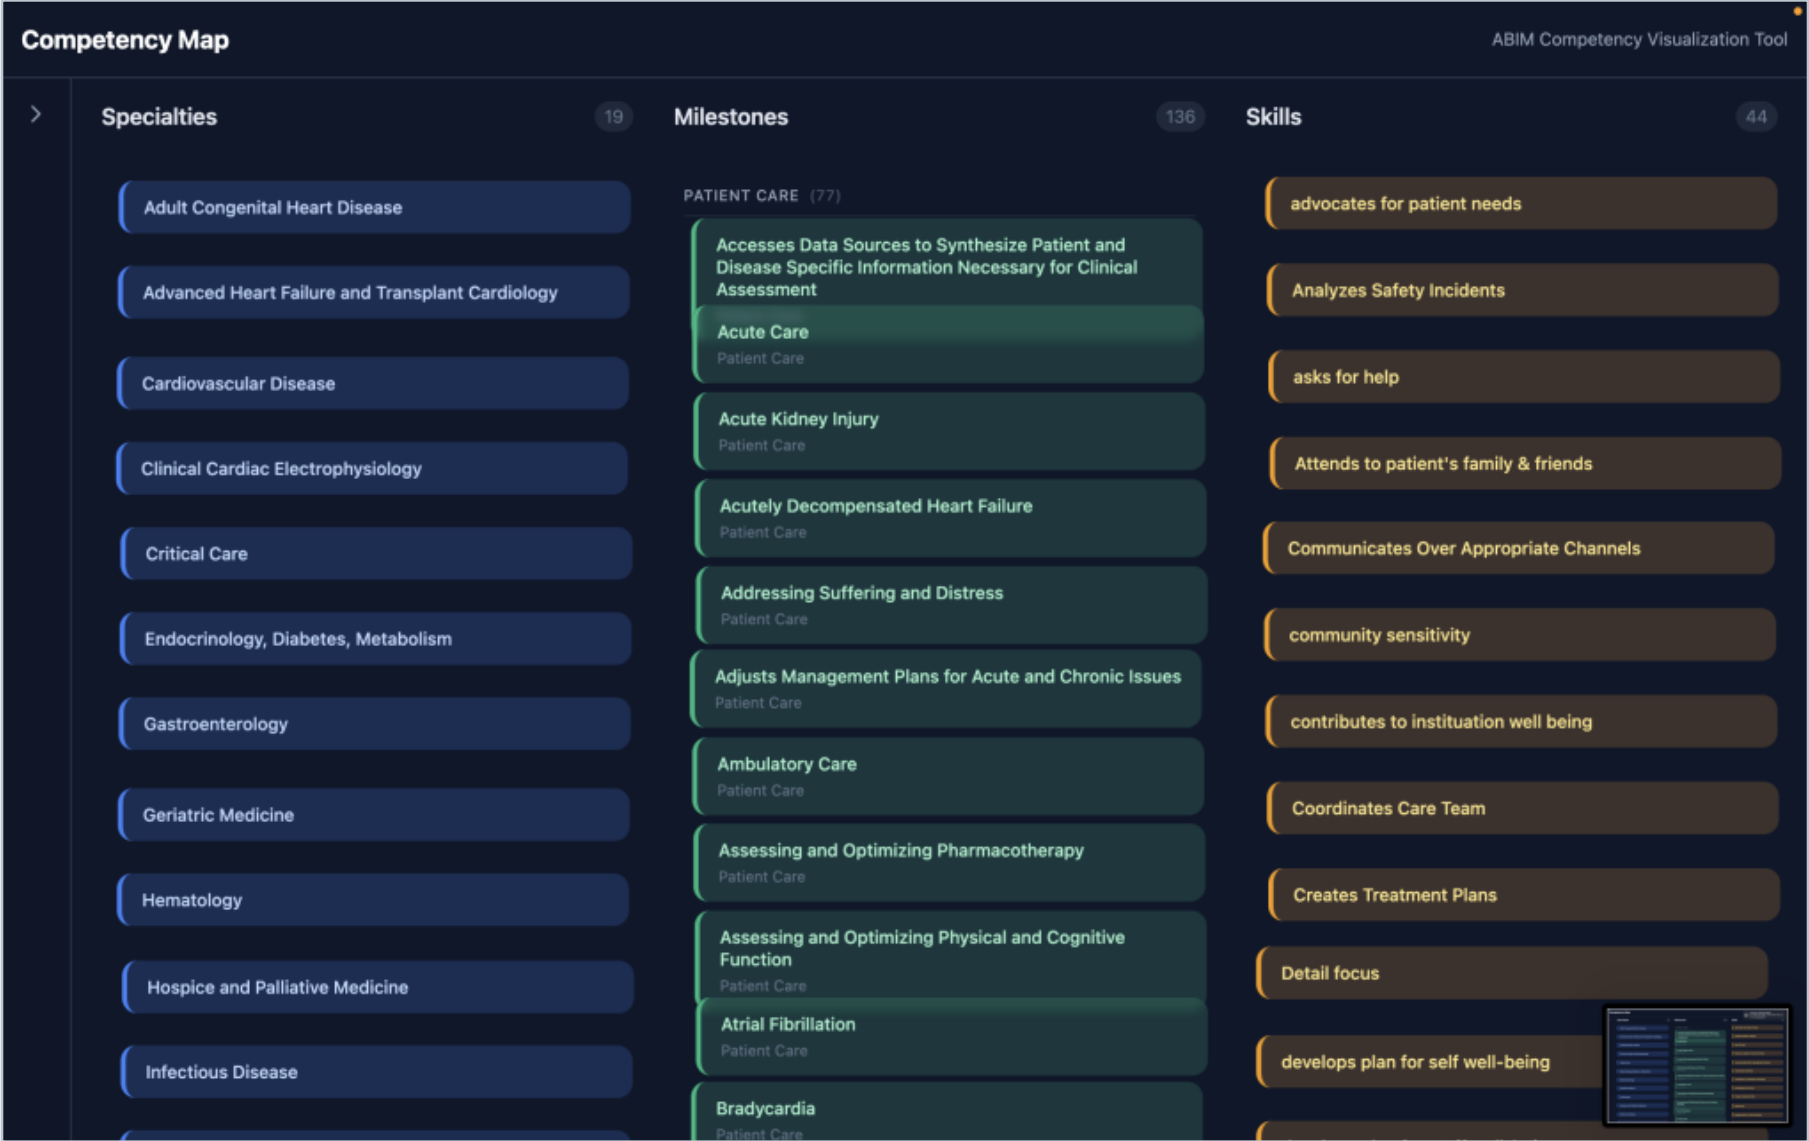

Zoom in on a single item's links

Finalizing the wireframe

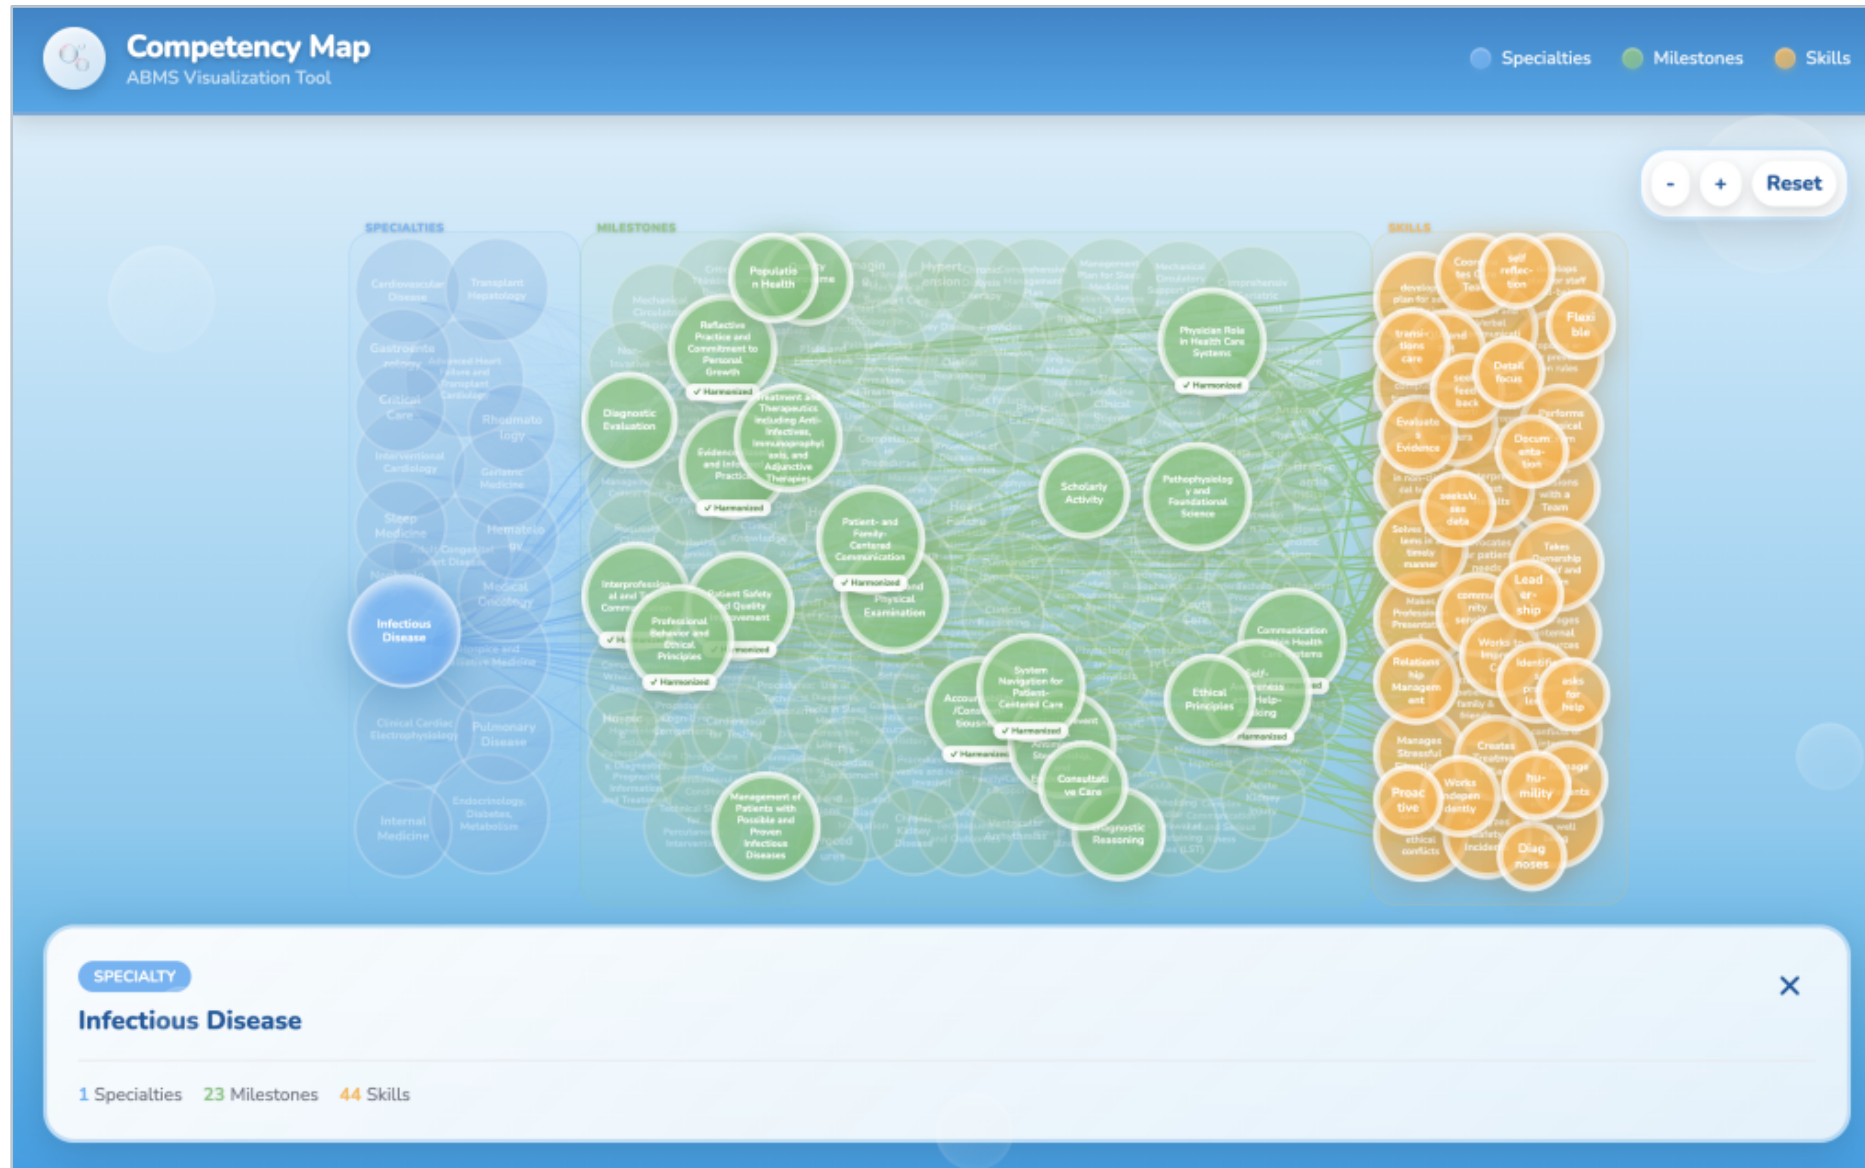

- Click an item, see what connects
- Search in the sidebar
- Connections shown by default
- A database you can work in

Building the App

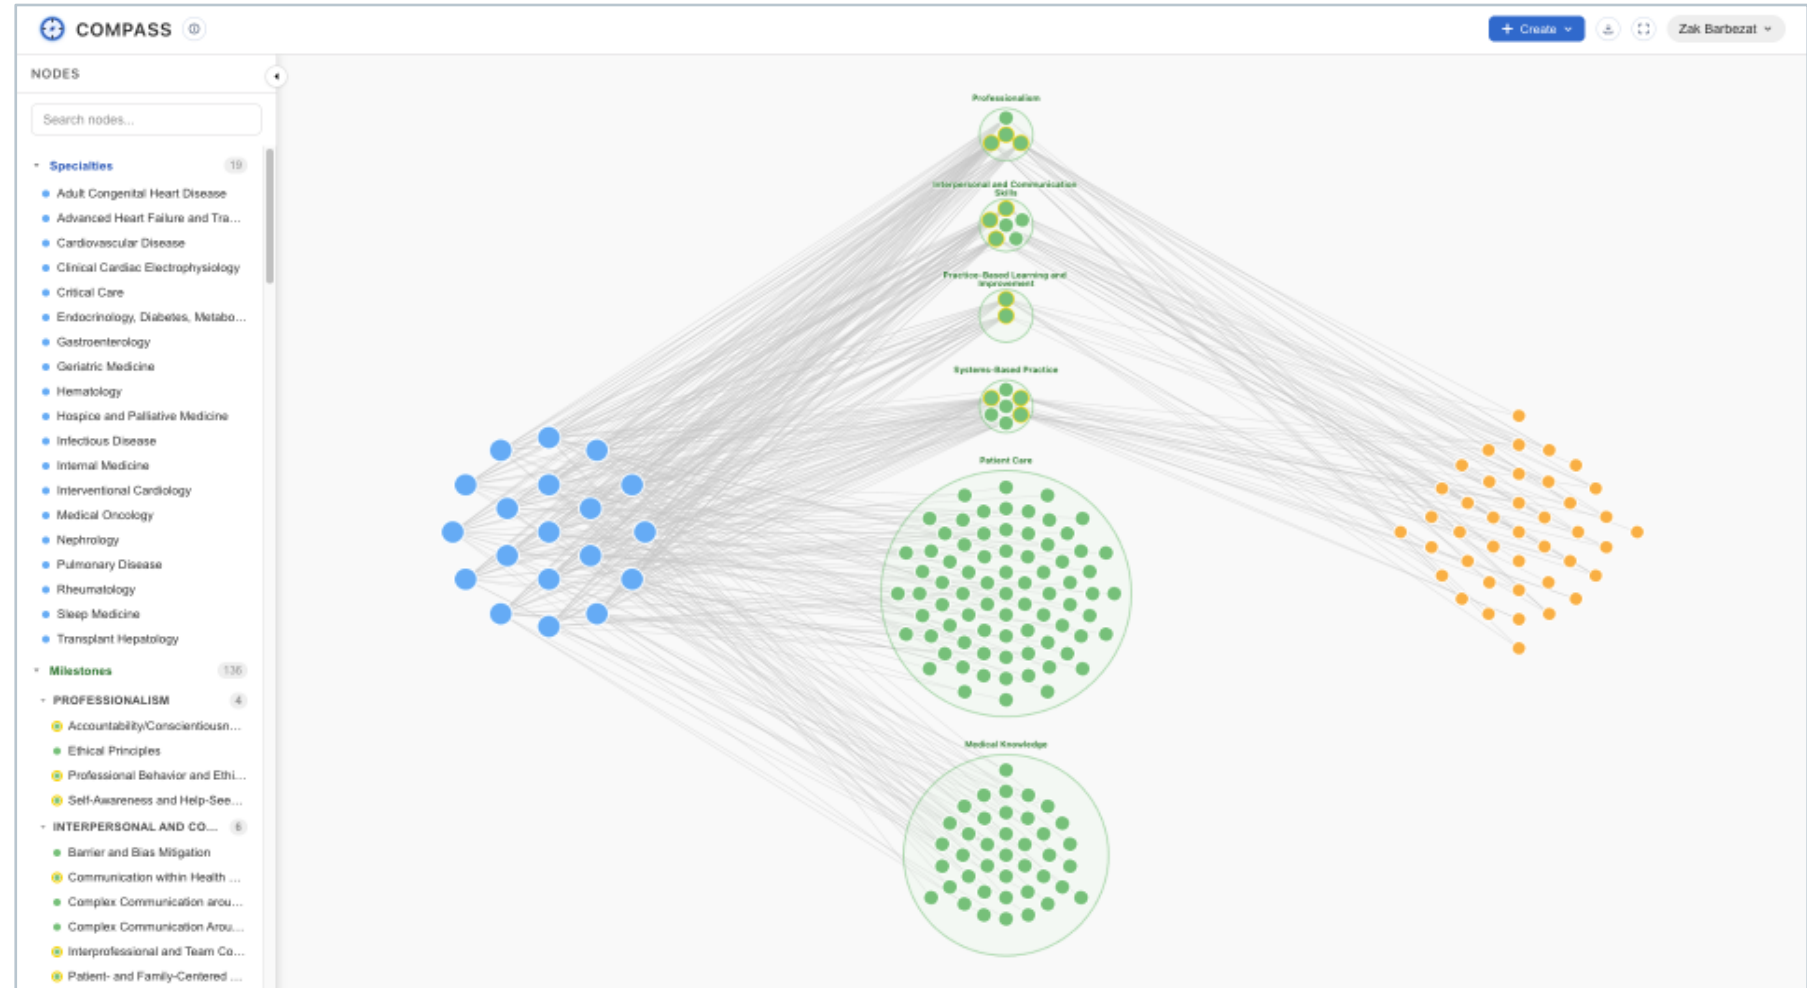

Some Progress

Final Product

Rebuilt the way I would have myself

- A library manages the UI
- A stack I can review
- Built to be maintained

Competency Mapping Tool

Why?

- Can we leverage emerging technologies to assess core **competencies other than knowledge**?
- How do we select **skills and behaviors** to test?
- What might a **measurement construct** look like?
- What **emerging technologies** would be helpful in testing competencies other than knowledge?

Future Enhancements

The screenshot displays the COMPASS application interface. On the left, a sidebar titled 'NODES' shows a search for 'Communi' with 3 results. The results are categorized into 'Milestones' (2 items), 'INTERPERSONAL AND COMM...' (2 items), and 'Skills' (1 item). The 'Skills' section is expanded, showing 'Communicates Over Appropriate...'.

The main area features a network diagram with nodes representing various medical specialties and concepts, such as 'Adult Congenital Heart Disease', 'Advanced Heart Failure and Transplant Cardiology', 'Cardiovascular Disease', 'Communication within Health Care Systems', 'Patient Safety and Quality Improvement', 'Clinical Cardiac Electrophysiology', 'Critical Care', 'Endocrinology, Diabetes, Metabolism', 'Gastroenterology', 'Hospice and Palliative Medicine', 'Interventional Cardiology', 'Pulmonary Disease', 'Transplant Hepatology', and 'Communicates Over Appropriate Channels'.

A 'Create Draft Skill' modal is open in the center, containing the following fields:

- Name ***: A text input field with the placeholder 'Enter skill name'.
- Description**: A text area with the placeholder 'Optional description'.
- Related Milestones ***: A dropdown menu with the placeholder 'Select milestones...'.

At the bottom of the modal are 'Cancel' and 'Create Skill' buttons.

Below the modal, the details for the skill 'Communicates Over Appropriate Channels' are visible. It is labeled as a 'SKILL/BEHAVIOR' and has a 'Published' status. The description field contains the placeholder text: 'Placeholder description for skill 'Communicates Over Appropriate Channels''. At the bottom of this section are two buttons: '+ Add Milestone' and '+ Add Annotation'.

Thank You
